

Environment Policy

Sai Engineering Associates Ltd. acknowledge the necessity to take into account the effect of their activities have on the environment when executing any of their day-to-day functions, whatever and wherever they may be. The following environmental policy will be observed by the business and its employees:

- The Company objective is to have a policy of effecting continual improvement and change in accordance with developing knowledge and changing environmental requirements.
- All staff are aware of the environmental sensitivity of the business sector, in which the Company operates and seek to continually develop the Company's environmental compliance.
- All the Company's operations must be carried out with due regard to the appropriate and relevant legal requirements; we are committed to the prevention of pollution.
- To recycle reusable material and equipment wherever possible.
- To use environmentally friendly materials, services and products in all its operations, whenever possible.
- To ensure that, where appropriate, employees are trained to carry out their tasks with due attention to the environment, associated aspects and impacts.
- To reduce the consumption of fuel, energy and natural resources by design improvements, measure to conserve, and driver training.
- Through the commitment of the business and all its employees, and through the promotion of health, safety and quality issues to work to continually improve our environment
- The Company co-operates with, and assists to the best of its ability, officers of the Environment Agencies in the exercise of their duties.
- The Company will take whatever measures may be necessary to ensure that the collection, transport and disposal facilities, which it utilises, are not and do not become hazardous to public health or the environment.

This policy will be reviewed annually or when circumstances indicate a change is needed.
